Subject: RE: NSPS Subpart OOOOa

One last question. If a new compressor station is built, would it not fall under the fugitive emissions standard, even if the compressor would be considered existing (originally installed prior to 2011)?

Brandon,
Sorry for the delay, but try the website listed below. Hopefully, this will provide the information you need.

My name is Brandon Cranford with the Alabama Department of Environmental Management. We've spoken before concerning this regulation and you have been extremely helpful. I have a question regarding a proposed stay on the fugitive emissions monitoring specified in 40 CFR §60.5397a. I have seen conflicting stories concerning whether the stay is actually in place or not. I remember a Federal Register proposing a two year stay, but have seen news articles saying there is not a stay. Can you clarify this for me?
